The "Killarney Box" Public Lighting (PL) interface box.

When separating Public Lighting (PL) Equipment from ESB's electricity networks, there must now be an 'interface unit' for all public lights mounted on ESB Overhead Networks or directly supplied from ESB Overhead Networks in accordance with Electro Technical Council of Ireland (ETCI) wiring regulations.

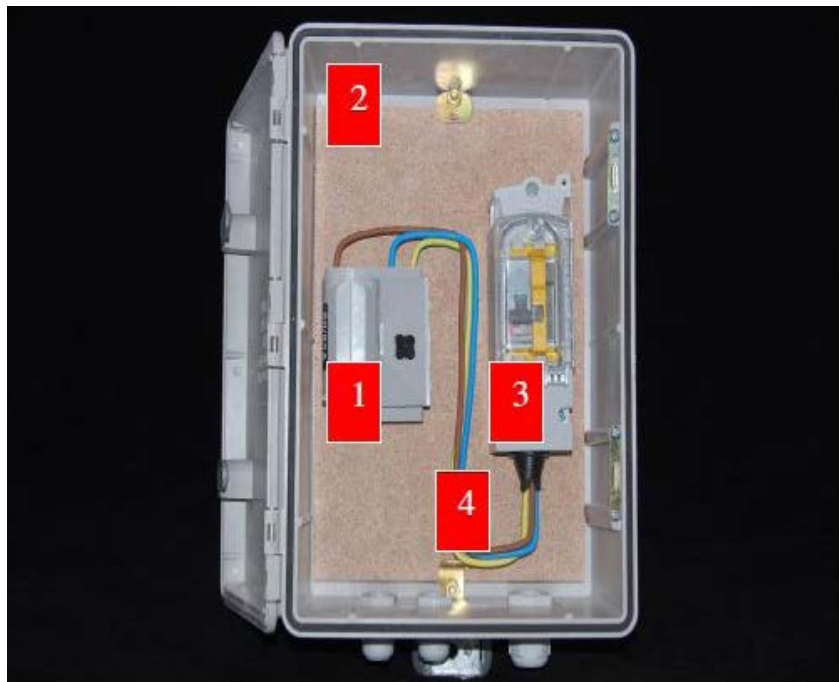

The ESB requirements takes into account the time to retrofit 'interface units' on existing public lights and enable Local Authorities or their agents to carry out work using the "Killarney Box", Public Lighting (PL) interface box.
