

FOR ALL YOUR PUMPING SOLUTION

TRICEL PUMPS PRESSURISATION UNIT

TRICEL PUMPS PRESSURISATION UNIT

Pressurisation Unit Features

Tricel Pumps PU45 H/L Pressurisation Unit Features Single PM 45 Pump, Break tank, Pressure vessel, Isolating Valve, Non return valve, Pressure Reducing Valve, Pressure switch, High & Low-pressure switches, Ballcock & Float, Skid mounted,

Pump Material Specification:

All pumps are the horizontal peripheral type with bronze body and impeller and are fitted With mechanical seals.

The motor is enclosed with external ventilation.

Shaft in stainless steel.

Liquid temperature 0-90 Deg C

Max ambient temperature 55 Deg C

Pump Speed 2900 rpm

Break Tank:

10 gallon active capacity and manufactured from polyethylene with ball valve To BS1212 part 2 ,WRC and water bye-laws.

Ranco Pressure Swicthes

Differential screw, Range screw, Range indicator, Manual Reset (Where Applicable)
Terminals 1,2,4, , Earth screw, Differential indicator, Mounting screws
